

Herefords Australia DNA Testing Process

*Valid October 2024

From October 2024, the DNA testing process for Herefords Australia (HAL) members has changed to become more efficient. Members can now send their samples directly to Neogen Australasia if accompanied with the correct paperwork. Members are advised to follow the steps below:

1. Ensure your animals are registered in the HAL database - HAL cannot request a test for an animal that is not in our database.
2. Collect your DNA samples. (If using Hair cards, visit our online store to ensure you have current Hair cards. Repackaging fees may apply for old cards).
3. Download the most up to date DNA Test Request Spreadsheet from the HAL website located: Member Services tab > Forms and Templates
4. Complete the DNA Test Request Spreadsheet and email this to: registrar@herefordsaustralia.com.au

HAL will not provide members with the paperwork they require unless a DNA Test Request Spreadsheet has been provided.

5. HAL staff will submit your test requests to Neogen and reply to your email with an Acknowledgement letter.

6. Print this Acknowledgement letter and attach your samples to it.
Post to: Neogen Australasia, 14 Hume Drive, Bundamba, Ipswich QLD 4304

7. Within 4-6 weeks of the lab receiving your samples you results are sent to HAL to load into our database. HAL will email a copy of these results to you.
8. Members will receive an invoice HAL for their tests at the end of the month from HAL.

Members do not have to post the Acknowledgement letter to the lab if you are requesting a test from a sample that is already stored at Neogen. Complete the spreadsheet with the sample type as 'Done'. The paperwork sent from HAL to Neogen will begin the testing process.

If you have any questions about the DNA testing process, please contact the office on 02 6772 1399.
